

The building that houses dimend SCAASI is as much a part of Chicago's jewelry history as the store itself. The Mallers Building at 5 S Wabash Avenue was constructed in 1912 specifically to serve Chicago's growing diamond and silver trade. Understanding the building's history adds dimension to the experience of visiting the store. Chicago's jewelry district on Wabash Avenue developed in the late nineteenth and early twentieth centuries as the city's commercial center expanded. The demand for a purpose-built facility to house the increasing number of diamond and gem dealers led to the Mallers Building's construction. The building's design reflected the practical requirements of the jewelry trade. Multiple floors of individual suites allowed many dealers to operate independently within a single building that concentrated expertise and created a marketplace effect. This structure remains in place today, with dozens of jewelry and gem businesses operating across the building's floors.

Graphite & White

Chicago Jewelry Store

dimend SCAASI's placement on the 17th floor gives the suite an elevated position within the building that provides a distinctive perspective on the Chicago skyline. The city visible from the windows of the store is an appropriate backdrop for the kind of significant purchases that take place within it. The building's century of continuous operation as Chicago's premier jewelry address gives dimend SCAASI's location a context that no modern retail development can replicate. A jewelry store that has operated in this building since 1997 is connected to a tradition that extends far beyond its own history. For Chicago couples who appreciate the character of historic locations, visiting dimend SCAASI in the [jewelry repair Chicago](#) Mallery Building is an experience in itself before the first diamond case is opened.
