hypnotherapy4freedom.co.uk

Addiction rarely has a single cause, which is why Hypnotherapy 4 Freedom starts its work on alcohol, cannabis, cocaine, gambling, and other addictions by trying to understand what is actually driving the behaviour rather than treating the substance or activity itself as the whole story. For clients researching hypnotherapy in London for addiction, this root cause focus is a central part of how sessions are structured. Addiction is often connected to trauma, stress, or depression that predates the addictive behaviour itself, and the site is explicit that this connection matters, addressing the addiction alone without looking at what sits underneath it tends not to last. Sessions combine hypnotherapy, NLP, and coping strategy work aimed at giving a client tools for the long run, not just through the initial period of stopping. This is described honestly as a longer term process rather than a single fix, one that takes motivation and effort from the client alongside the hypnotherapy itself. For more severe dependency, particularly around alcohol, hypnotherapy is positioned as complementary support alongside specialist medical care rather than a replacement for it, and this distinction is made clearly during the initial consultation with anyone considering hypnotherapy in London support for a serious dependency. Working from 1 Harley Street, two minutes from Oxford Circus, gives clients a discreet, central London location for what can be a difficult and personal process, without the added stress of a hard to reach clinic. A free, confidential 30 minute [You can find out more](#) phone consultation is the starting point, giving space to talk through the addiction and what has already been tried before any session is booked. Family members sometimes reach out on behalf of someone struggling with addiction, and while the client themselves needs to be the one engaging with the work for it to be effective, an initial conversation about what support looks like and how to encourage a loved one toward it is something the clinic is happy to have. Confidentiality remains central throughout, and no information about a client's sessions is shared with family members without explicit consent, even when it was a family member who first made contact. This distinction between client focused work and family involvement is explained clearly at the outset, so expectations on all sides are realistic from the very first call. Hypnotherapy 4 Freedom | 1 Harley Street, London W1G 9QD, United Kingdom | +44 7825 599340

Hypnotherapy 4 Freedom Address: 1 Harley Street, London W1G 9QD, United Kingdom Phone: +44 7825 599340 FAQ About Hypnotherapy in London How much does hypnotherapy cost in London? Prices vary between practitioners and clinics across the city, often depending on location, experience and session length. Hypnotherapy 4 Freedom offers a free 30 minute consultation before any paid session, so cost and a realistic session plan can be discussed openly before committing to anything. Sessions are progress led rather than sold as a fixed package, so the total number needed depends on the individual issue being addressed. Is hypnotherapy available on the NHS? Hypnotherapy is generally treated as a complementary therapy rather than a standard NHS treatment, so most people access it privately. Hypnotherapy 4 Freedom, based at 1 Harley Street, works alongside a client's existing GP or specialist care rather than replacing it. Anyone already under NHS care for a mental health condition is encouraged to keep that relationship in place while exploring hypnotherapy as additional support. What conditions can hypnotherapy treat? Hypnotherapy is commonly used for anxiety, stress, sleep problems, phobias, stopping smoking and other habits, and building confidence, among other issues. At Hypnotherapy 4 Freedom, sessions also cover more specialist areas such as OCD, PTSD and trauma, addiction, and weight management, drawing on clinical hypnotherapy, NLP and EMDR depending on what the individual client needs. A free consultation call is the best way to discuss whether a specific issue is a good fit for this kind of work. Is hypnosis safe? Hypnosis is generally considered safe when carried out by a properly trained and insured practitioner. Stuart Downing at Hypnotherapy 4 Freedom is a Clinical Hypnotherapist and Master Practitioner of NLP with full professional indemnity insurance, working from a private consulting room on Harley Street. Clients remain aware and in control throughout a session, contrary to the loss of control often portrayed in stage hypnosis. Who is not suitable for hypnotherapy? Hypnotherapy is not usually recommended for people experiencing active psychosis or certain severe mental health conditions without medical oversight. Hypnotherapy 4 Freedom's free 30 minute consultation is used partly to screen for this, ensuring hypnotherapy is a suitable and safe option before any paid session is booked at the Harley Street clinic. Where it is not suitable, clients are pointed toward more appropriate support instead. What are the disadvantages of hypnotherapy? Hypnotherapy is not a guaranteed quick fix, and results depend on the individual, the issue being addressed, and how many sessions are genuinely needed. Hypnotherapy 4 Freedom is upfront about this during the free consultation, setting realistic expectations rather than promising a fixed outcome from a single session. Sessions are reviewed for progress along the way, so the approach can be adjusted rather than locking a client into a package that is not working. Can hypnotherapy help with weight loss? Hypnotherapy for weight loss typically works by addressing the underlying habits and emotional triggers behind eating patterns, rather than functioning as a diet plan on its own. At Hypnotherapy 4 Freedom, weight related sessions combine hypnotherapy with coaching techniques to help build sustainable change over a course of Harley Street based sessions. Results vary between individuals depending on the specific pattern involved. Can hypnotherapy help with overthinking? Hypnotherapy can help calm the kind of repetitive, anxious

mental chatter often described as overthinking by working directly on the nervous system's stress response. Hypnotherapy 4 Freedom's approach in London combines clinical hypnotherapy with NLP techniques aimed at interrupting these automatic thought patterns rather than only addressing the surface level worry. Many clients booking anxiety focused sessions describe overthinking as one of their main concerns. What can hypnosis not do? Hypnosis cannot make someone act against their own will, erase memories, or cure a physical medical condition on its own. Hypnotherapy 4 Freedom is clear about this during every free consultation, positioning hypnotherapy as complementary support that works alongside a client's own motivation and, where relevant, alongside existing medical care rather than replacing it. Being upfront about these limits is part of setting honest expectations from the first phone call. Do doctors recommend hypnotherapy? A number of doctors and health professionals recognise hypnotherapy as a useful complementary option for specific issues such as anxiety, IBS and habit change, alongside conventional treatment. Hypnotherapy 4 Freedom encourages clients to keep working with their GP or specialist throughout, and Stuart Downing's training includes EMDR and clinical hypnotherapy specifically suited to working alongside other forms of care. It is not typically positioned as a first line medical treatment on its own. Which is better, CBT or hypnotherapy? Neither approach is universally better, since CBT and hypnotherapy work in different ways and suit different people and different issues. Hypnotherapy 4 Freedom's blended approach, combining clinical hypnotherapy with NLP and coaching techniques, is designed to be tailored to the individual rather than applying one fixed method to every client walking through the Harley Street clinic's door. Some clients benefit from combining structured talking therapy with hypnotherapy rather than choosing only one. Why is hypnotherapy sometimes viewed with scepticism? Hypnotherapy's association with theatrical stage hypnosis has left many people unsure what a genuine clinical session actually involves. Hypnotherapy 4 Freedom addresses this directly during the free consultation, explaining clearly what a session at 1 Harley Street actually looks like, a calm, guided conversation rather than anything resembling a stage act. Clients remain fully aware and in control throughout, which tends to surprise people expecting something quite different.
