

Recover Your Missing Seed Phrase Words

Losing one or more words from your crypto wallet recovery phrase doesn't have to mean losing access to your assets forever. CieldX Wallet provides a secure, step-by-step recovery process to help you identify the missing words and restore access to your wallet.

What You'll Need Before Starting

Before beginning the recovery process, ensure you have the following in place.

Most of Your Seed Phrase

You must remember the majority of your recovery phrase — only one or a few words should be missing.

A Computer

Windows or Mac OS device to install the official CieldX Wallet application.

A Secure Environment

Work on a trusted device, away from prying eyes, to protect your recovery process.

Download the Official CieldX Wallet

Always download from the official source to avoid counterfeit applications and security risks.

Windows

[Download CieldXWallet.exe](#)

Mac OS

[Download CieldXWallet.dmg](#)

Only download from the official CieldX website. Third-party downloads may contain malware or phishing attempts.

Set Up Your Wallet

Step 1 – Create a New Wallet

After installing, launch CieldX Wallet and select "**Create Wallet**" to begin setup and unlock all recovery tools.

Step 2 – Generate a Secure PIN

You will be prompted to create and confirm a PIN. Choose a strong PIN and store it safely — it protects your wallet and recovery activities from unauthorised access.

Access the Recovery Tools

Once setup is complete, navigate to the **left-side menu** to find recovery options tailored to your situation.

1

One Missing Word

For a single unknown word in your phrase.

2

Two Missing Words

When two consecutive or separate words are missing.

3

Three Missing Words

Handles up to three unknown positions.

4

Four or More

Supports multiple missing words and incomplete phrases.

Select the option that matches your situation before proceeding.

Enter Your Seed Phrase

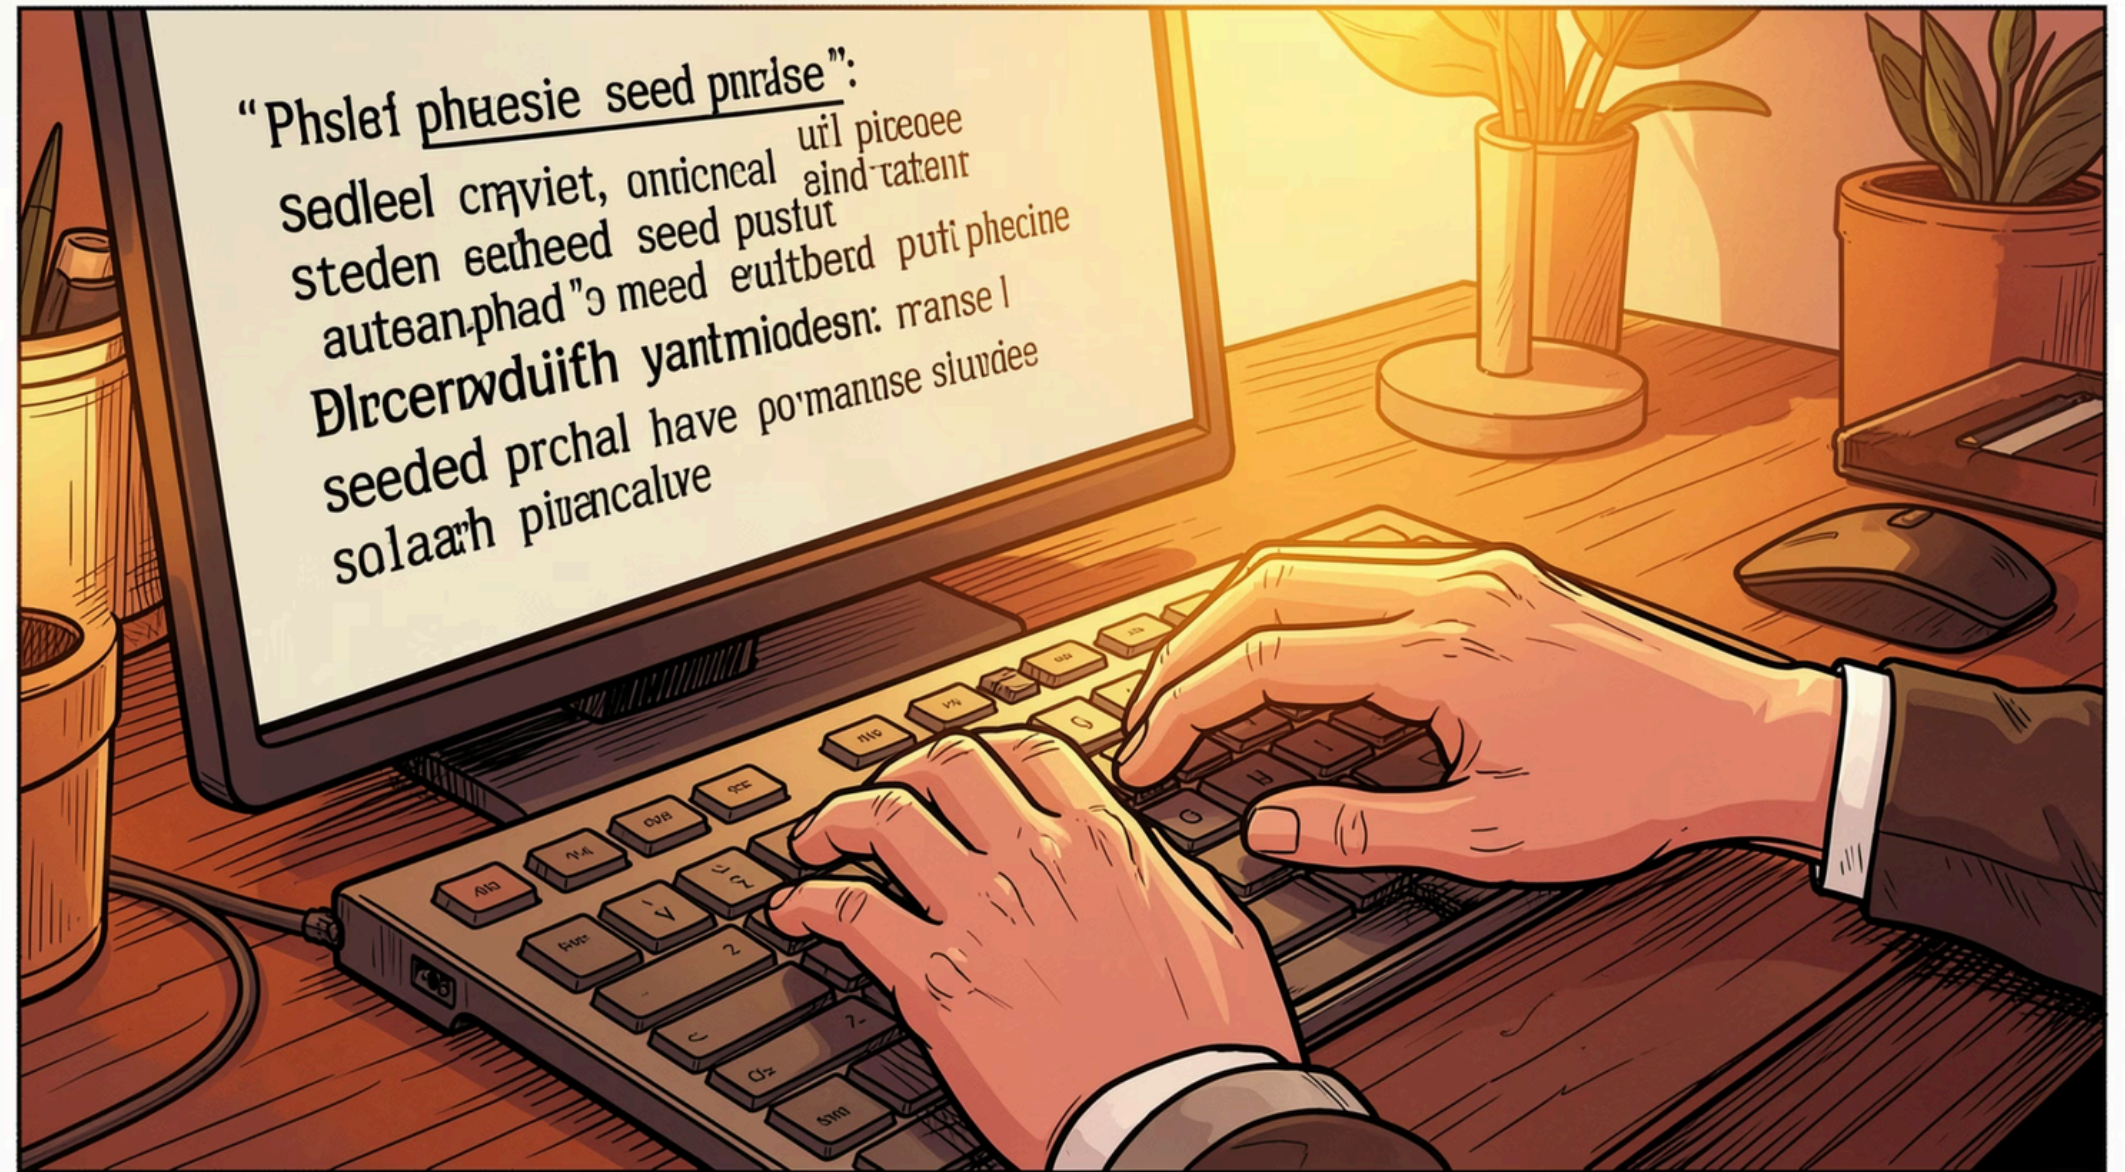

How to Enter Missing Words

Type the recovery phrase words you remember. For every missing word, replace it with **????** as a placeholder.

Example: If your phrase is
*abandon ability able about above
absent...*
and you forgot the fourth word,
enter:
*abandon ability able **????** above
absent...*

You can use multiple **????** placeholders if more than one word is missing.

Start the Recovery Search

After entering your partial phrase, click "**Search Combinations**". CieldX Wallet will analyse the phrase structure and generate all valid **BIP39** word combinations based on the missing positions.

Processing Time

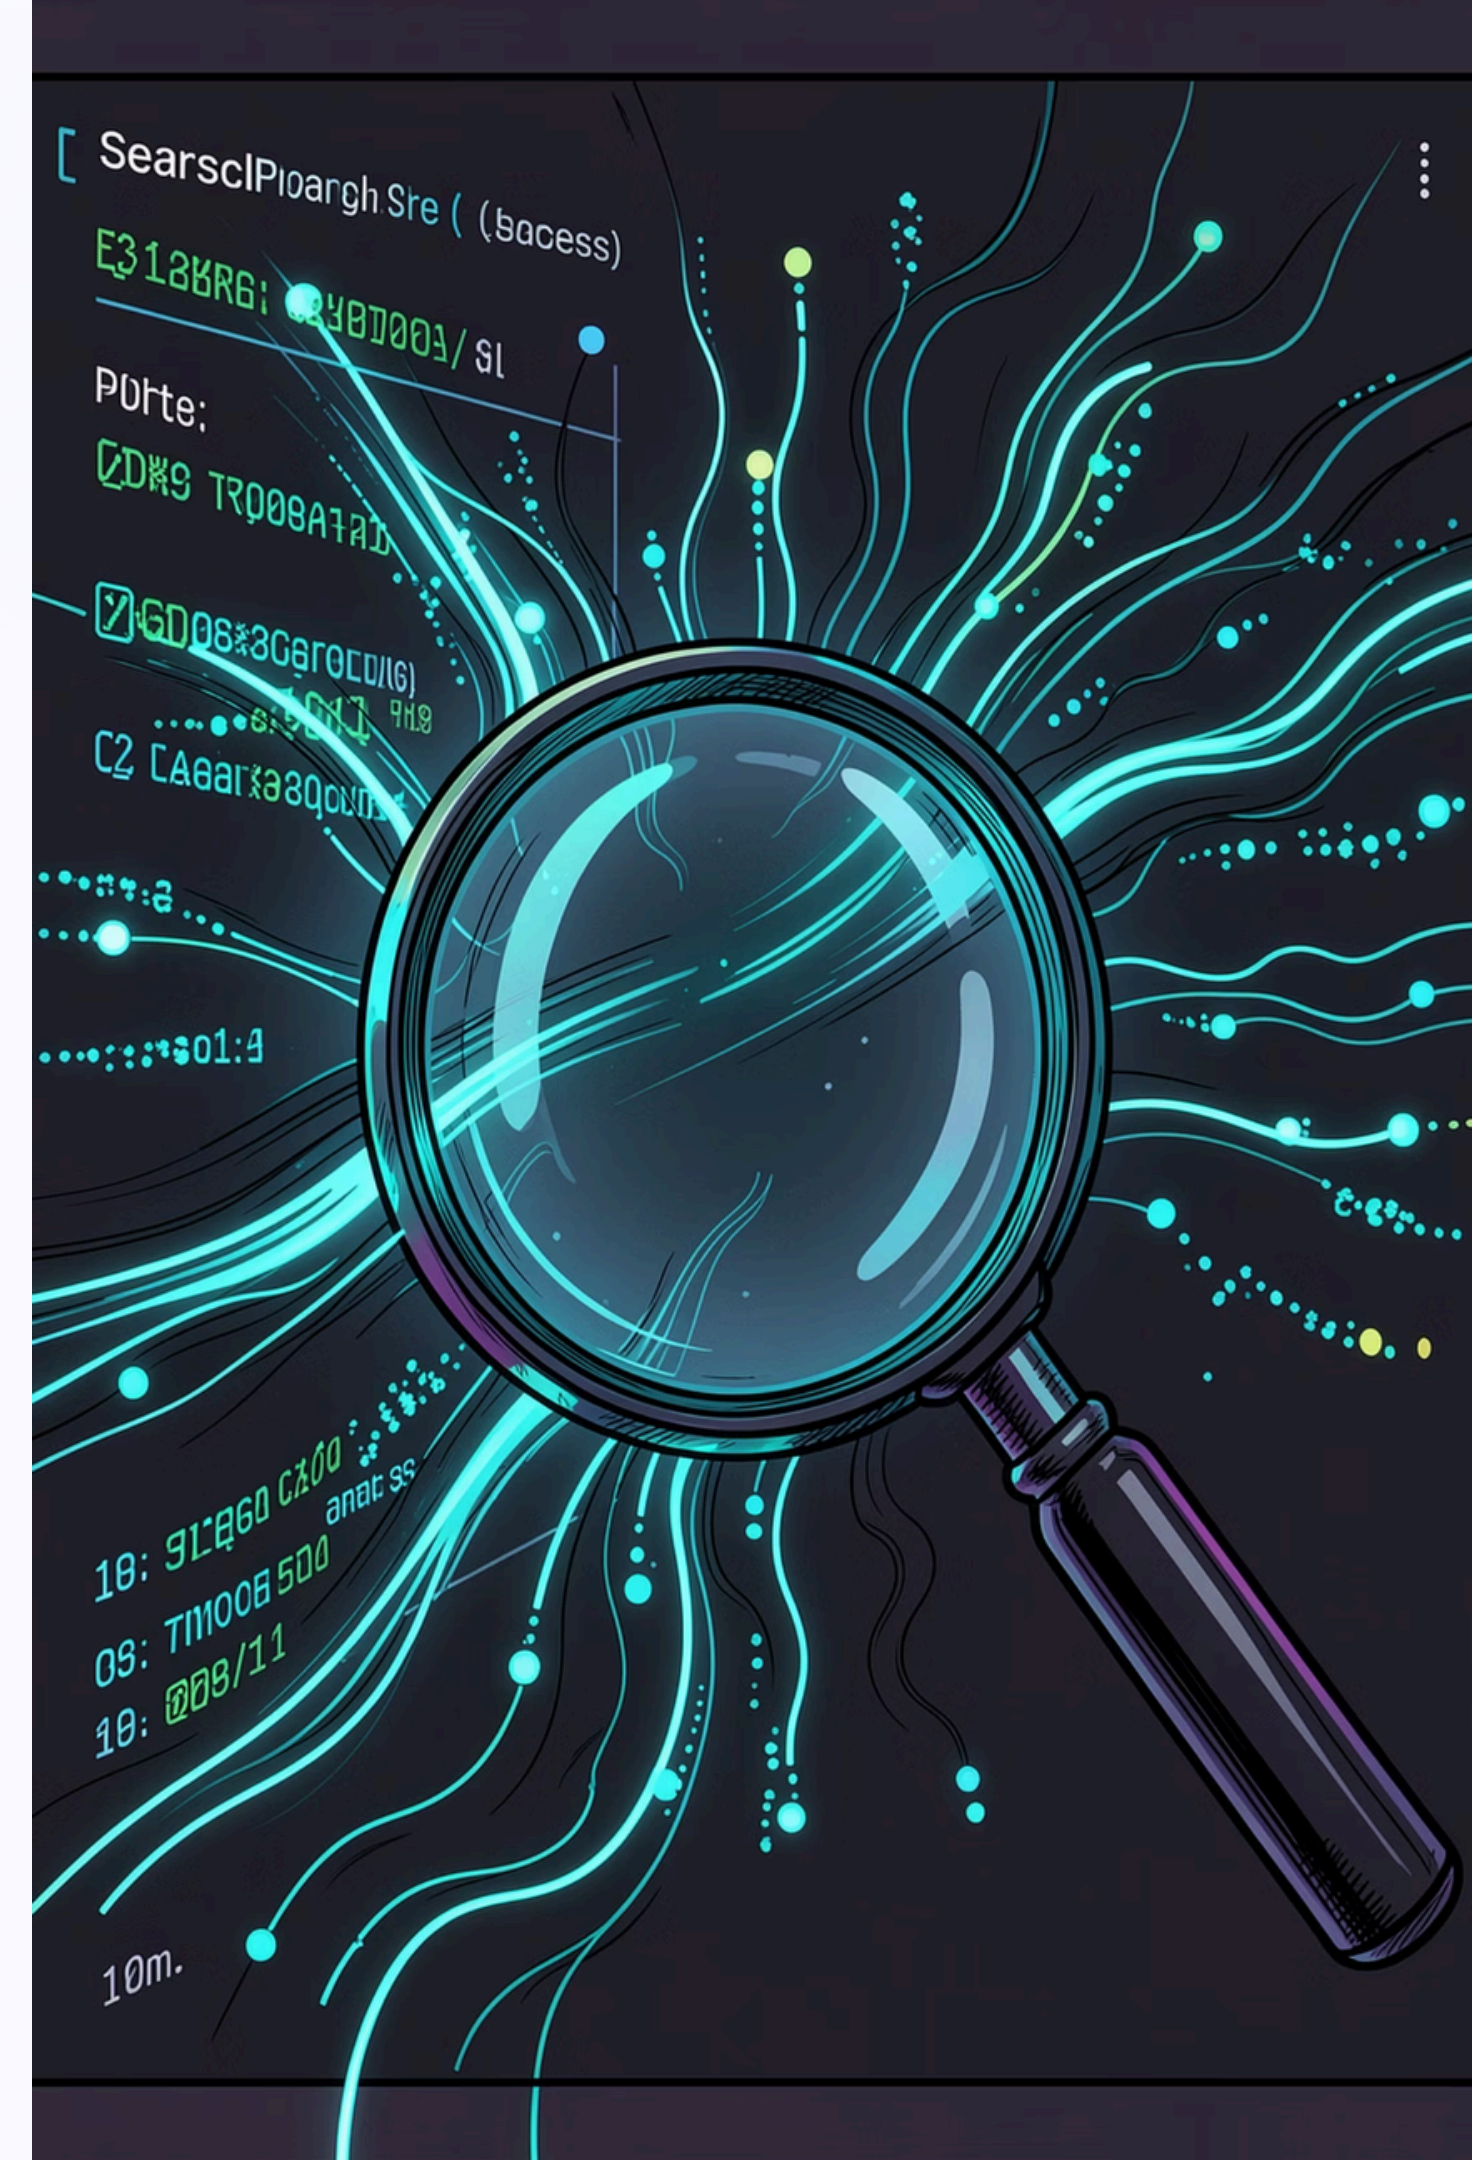

Depending on how many words are missing, the search may take a few moments to complete.

BIP39 Standard

All generated combinations are validated against the BIP39 word list for accuracy.

Result List

You will receive a list of valid recovery phrase candidates to test.

Review & Test the Results

Review the Generated Combinations

Once the search completes, CieldX Wallet displays potential seed phrase candidates. Carefully review each one.

Test Each Combination

Try importing each generated phrase into your wallet. When the correct combination is found:

- Your wallet addresses will match the original
- Balances and transaction history become accessible
- Full access to your crypto assets is restored

Save Your Recovered Seed Phrase

Once you've regained access, secure your complete seed phrase immediately.

- **Write It on Paper**
Record the full phrase by hand on durable paper.
- **Store Offline**
Keep it in a secure, offline location — a safe or lockbox.
- **Avoid Digital Storage**
Never save it in screenshots, cloud storage, emails, or messaging apps.
- **Create Backup Copies**
Consider multiple secure backups to prevent future recovery issues.

You've Got This – Stay Secure

Misplacing part of your seed phrase does not mean losing your crypto forever. With CieldX Wallet's recovery tools and most of your phrase available, you can restore access safely.

Your Seed Phrase Is Your Master Key

It controls access to all your digital assets — treat it with the utmost care.

Use Official Tools Only

Always rely on the official CieldX Wallet to avoid security risks.

Back Up Properly

Store your recovered phrase offline in multiple secure locations.

 Your assets are recoverable. Follow the steps carefully and you'll be back in control.
